2. Authorization for this examiner's amendment was given in a telephone interview with Keith Murphy on 9/2/04.

3. The application has been amended as follows:

In claim 3, line 12 the word "said" has been changed to --a--.

In claim 11, line 1 the number "7" has been changed to --5--.

In claim 20, line 10 the word "said" has been changed to --a--.

In claim 29, line 2 the word "mounted" has been changed to --coupled to--.

4. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose a load displacement system coupled to a power assist mechanism and allowing transient loads of a steering mechanism to be displaced.

The prior art further fails to disclose a rack; a ball-screw mechanism/rotary-to-linear mechanism coupled to the rack at one end and an electric motor at the other; a first coupling mechanism coupled the electric motor to the rack housing and a second coupling mechanism coupling a ball nut to the rack.

Art Unit: 3611

The prior art still further fails to disclose a method for providing an actuation force to a rack of a vehicle comprising: isolating non-axial loads from an electric motor of a steering system, the motor providing a rotational force to a rotatable member of a rotary-to-linear conversion device; and isolating non-axial loads from a linearly actuatable member of the rotary-to-linear conversion device, the linearly actuatable member being coupled to a rack of the steering system.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
